

The Quebec City Duplex Postmarks

by Lawrence A. Walker and Jean-Guy Dalpé

To conclude the Quebec duplex postmarks, we present the list of Quebec City hammers. These would require a detailed analysis for their proper identification, which for the time being we are unable to perform. Consequently, only in a few clear

cut cases has the use been given. May we remind our readers once more:

a) our lists are restricted to the Pritchard and Andrews proof impression books from 1908 to 1965; b) the "diameter" heading refers to horizontal measurements taken from the first copy of these books.

Next instalments: Ontario.

PHSC Journal #46 carried a second article about the Montreal Duplex Postmarks, by Larry Walker and Jean-Guy Dalpé. The table that follows was submitted by Hans Reiche, and provides additional information on these

interesting postmarks for the specific Admiral period. No information is available regarding the proof dates. It should be noted that killers 3, 4, 7 and 8 are all known to occur in two types - a thin and a thick numeral. Arranged in order of killer.
